What was done, in four stages

Exp 1
does the absorber do anything?

Exp 2
what does it change?

Exp 3
is the response proportional?

Exp 4
which wavelengths?

Exp 5
which reactions?

Exp 6
which altitudes?

Exp 7
moving the absorber up or down

Exp 8
changing its spectrum

Exp 9
letting chemistry place it

Exp 10
is the result reproducible?

Exp 11
computed cross sections

Exp 12
screen of every species

Exp 13
iron sulfate minerals

Exp 14
ferric chloride in acid
