Same molecule, same spectrum: placed by its own chemistry, it falls out of the response band
(optical depth above the band falls by a factor of 2.0×10^{8})
Empirical profile, as prescribed in the model
optical depth above 69 km: 8.1928
share of profile in the band: 9.1940 per cent
response band 69 to 93 km
centroid 63.42 km
ClS_2 placed by the model's own chemistry
optical depth above 69 km: 4.0153×10^{-8}
share of profile in the band: 0.0000 per cent
response band 69 to 93 km
centroid 13.66 km
