The mixing used in Phase 1 is far below what is measured
response band 69 to 93 km
convective cloud layer, Lefèvre et al. (2024):
1 × 10^6 to 1 × 10^8
alternative file:
raised at four levels,
by 8716 to 14011 times
used in every Phase 1 run
(Bierson and Zhang profile)
